## Additional features of Xplorer

- The 'I want to' button contains common tools such as printing a map, creating a property report, measuring distances, opening additional tools and displaying the layer list.

The layer list is contained in the slide out menu on the left hand side of the map. Layers can be turned on and off as required. Layers with a triangle are grouped and the group can be expanded by clicking on the triangle, then individual layers in the group can be turned on or off.

- Creating a printable map sets layout, format, resolution and scale (note the scale is independent from the map scale on your screen) and you can give the map a title. Once the file is created you can open it in a new window and print it.
